

# Ventotene

## Island of Peace - Gateway to Europe

***Renato Di Gregorio***  
***Responsible for Europe project of the Municipality of Ventotene***

**the municipality of Ventotene, two islands :  
Ventotene e Santo Stefano**

**Mediterraneo:  
The two islands are 50 km from the coast.**

**Ventotene** : in 1941, Altiero Spinelli and Ernesto Rossi wrote, with others, the Manifesto "for a free and united Europe", inspiring the construction of a federal Europe.

**Santo Stefano**: The Bourbon prison

# The port of Ventotene

**The ships that connect the coast to the island are dirty, expensive, slow and when the sea is rough they don't leave.**

**The airplane at water level: it doesn't fear the waves but it requires an investment for the business- an alternative?**

**We are looking for previous experience in EU projects to identify a boat that uses solar and electricity to navigate or an aircraft that flies over water and carries passengers even when you can't travel by ship**

**we could involve the island of Lampedusa, Retymo (Crete) and Itaca with which we have signed a Friendship Pact**

.....
